

# VLE Homework Help Sheet

Type this address into the browser: [vle.hollingworthacademy.co.uk](https://vle.hollingworthacademy.co.uk). This dialog box (picture below) may pop up. Type in your child's username and password and hit enter or click ok. This is the same username and password they use for logging into the school laptops. The screenshot below is an example of what it may look like.

When you log in, this is the page that is visible to you. It will have your child's name next to the welcome text. This is the Dashboard where you will see all the homework and subjects you can access. The homework set is displayed on the front page above the purple navigation buttons, in a section called "Tasks To Do".

This shows when the homework was set, who set the homework and when they need to be done by. On the right side it shows what teaching groups the student is assigned to. If they select the blue link they can then fully access it. Once they have completed the homework, they need to click on the "Mark As Done" button and it will remove their homework from the list.
